

Identity theft protection and a whole lot more.

Norton LifeLock Benefit Plans provide comprehensive, all-in-one protection against cyberthreats so employees can keep what's theirs, theirs.

Identity Theft Protection

Our proprietary technology monitors[†] for fraudulent use of employees' Social Security number, name, address and date of birth in applications for credit and services. The patented system sends alerts by text, phone[‡], email or mobile app when a potential threat is detected.

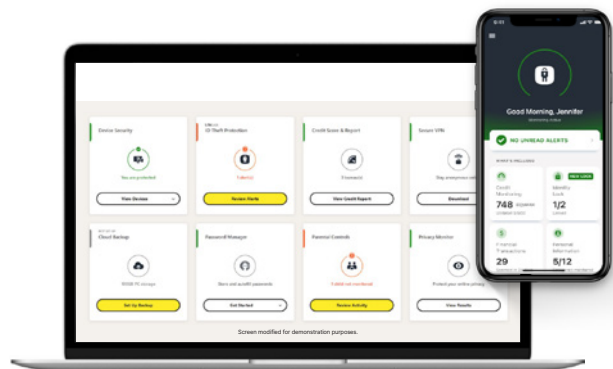

Device Security

Multi-layered, advanced security helps protect devices against existing and emerging malware threats, including ransomware, and helps protect private and financial information when employees go online.**

Online Privacy

Protect devices on vulnerable connections through bank-grade encryption to help keep information private. We also scan common public people-search websites for employees' info and help them easily opt-out.**

Screens modified for demonstration purposes. Subject to change.

No one can prevent all identity theft or all cybercrime.

[†] We do not monitor all transactions at all businesses.

^{**} These features are not enabled upon enrollment. Member must take action to activate this protection.

[‡] Requires your device to have an Internet/data plan and be turned on.

Layered protection for employees and their families.
